_		
Roo	km	ark

In this question, three statements related to each other, followed by three conclusions, i, ii and iii are given. Assuming that the statement is true, find out which conclusion is absolutely correct.

Statement:  $A \ge B > C$ ; C = I < T < E;  $T > L \ge G$ 

Conclusion:

- i) C> G
- ii) A>
- iii) B> T
- (A) Only ii is true (Alternative 4)
- (B) Only ii and iii are true (optional 3)
- (C) Only i and ii are true (alternative 2)
- (D) All are correct (Optional 1)

Question no.59 1.00

Bookmark

There is a hint in this question and a statement is given later. Carefully read the excerpts provided and determine the statement based on that episode. The

current Australian team has lost three of their last five Test series. They lost their last two Test series, one of which was against Pakistan, which is not considered to be a strong team now. Australia's two best batsman, Steve Smith and David Warner are currently suspended and their absence has weakened the Australian team.

There is a lot of dissatisfaction and introspection about how their national team plays in Australia, how they show aggression on the field, how they do not show respect to the team against them, and neglecting the media at the most, and focusing only on winning only, the discussion on the future of the game is ongoing. There are. Australian cricket never reached such a low level. This is the best opportunity to knock them into their own house. In other words, if this India could not beat Australia in Australia in this series, then it would prove that the campaign around this team is only the same: the propaganda.

Statement: India has a good chance of defeating Australia.

Choose the right one from the next option

A - The statement is completely true.

B-statement is most true.

There is no definitive definition based on C-statement.

D-statement is completely false.

- (A) O B (Alternative 2)
- (B) C (Alternative 3)
- (C) O D (Alternative 4)
